

EGYPTIAN SCROLL FRAGMENT PROJECT

Your task is to create your own personalized scroll fragment that contains a cartouche and a self portrait in the Egyptian style.

You will be using Hieroglyphics for the cartouche and the imitating the key components of Frontalism for the portrait.

Cartouche must contain the following and will be placed somewhere in your portrait composition.

- 1) Your name in hieroglyphics
- 2) A pill or oblong-shaped form
- 3) A decorative border around the edges of the pill/oblong shape
- 4) A base
- 5) A rope binding the base to the oblong form
- 6) A colour scheme applied that is earth-tone based

Your Portrait needs to contain the following:

- 1) A figure that represents you
- 2) Feet properly placed as per the Frontalism style
- 3) A facial expression that suits the style
- 4) Eye placement that is appropriate in terms of Frontalism
- 5) Clothing, Headwear, accessories and motifs that fit the era but have some kind of modern twist that represents you!
- 6) A colour scheme that imitates Egyptian art works we looked at in class.

You will be working in Conte, coloured pencil and/or gold paint (for accents) on paper. Consider how you can make the paper resemble the style...ancient perhaps?
